CBCD Staff: Deanna Elliott, Elliott DeLong, Dinah Gadberry, Harold Crose, Britton Baker

Call to Order and Introductions: Meeting called to order at 10:15 AM. All parties introduced themselves (See attendance)

Public Input: NONE

Yeates Cost Share: This project is seeking approval by the Grant County VSP working group. This project is an irrigation conversion from Rill to Pivot outside Quincy, WA to improve efficiency. The irrigation system would operate under low pressure without an end gun includes. The cost covers the pipeline and pad for irrigation on a 98-acre section of primarily silt loam soil. There is an existing weir that will provide the irrigation control structure. The average erosion potential is between 10 and 21 tons annually depending on cropping. The project will max out at \$50,000 for the cost share and the total is estimated at \$200,000, this depends on the cost of materials. The project will need to be completed no later than end of fiscal year on June 30, 2023.

Motion by H. Crose to accept the VSP Cost share approval as presented, seconded S. Krautchied, motion carries.

Adjournment- *Motion by S. Krautchied to adjourn. Seconded by H. Crose, motion carries.* The meeting adjourned at 10:26 AM.
